Education

University of Illinois Urbana-Champaign | June 2025 - Present
Master of Science in Computer Science

Western Washington University | Sept 2020 - June 2024
Bachelor of Science in Computer Science | GPA: 3.61/4.00

Technical Skills

Languages: TypeScript, JavaScript, SQL, Python, Java, C++, HTML, CSS
Frontend: React, Next.js, React Native, Expo, Vite
Backend & Data: Node.js, Express, REST APIs, Prisma, PostgreSQL, MySQL, ClickHouse, MongoDB, Neo4j
Cloud & Tools: AWS S3, AWS IAM, Firebase, Git, Docker, Linux, Clerk, Stripe, Jest

Experience

MehtA+ | May 2026 - Present
App Development Mentor
- Mentor two students building VirusWatch, a React/Vite and JavaScript web app for the Congressional App Challenge; guide component design, symptom-selection workflows, and navigation.
- Help students set up GitHub and local development environments, structure symptom data and matching logic, and debug React state, imports, and frontend/backend integration issues.
- Guide Gemini API setup and validate a standalone Node.js API test; break development into weekly tasks and support implementation and troubleshooting.

TradingFlow | July 2024 - July 2025
Full Stack Intern | Redmond, WA
- Developed an options data platform with Next.js, React, and TypeScript, enabling users to visualize financial datasets and download data through backend APIs backed by ClickHouse.
- Integrated Stripe subscriptions and Clerk authentication with protected application routes to support paid access and user management.
- Optimized frontend rendering and backend queries to improve responsiveness when exploring large financial datasets.

Selected Projects

Interview Tracker | May 2026 - Present
React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Clerk, AWS S3
- Create, edit, delete, and track job applications through an Express API and PostgreSQL persistence with Prisma.
- Clerk authentication scopes application data to each user. AWS S3 supports résumé uploads, viewing, and deletion, with metadata in PostgreSQL.

AI Weight Tracker App | Mar 2026 - June 2026
React Native, Expo, TypeScript, Firebase, OpenRouter API
- Firebase Authentication and Firestore synchronize user data across sessions.
- OpenRouter estimates calories and generates meal recommendations from natural-language food descriptions.

Academic World Dashboard | June 2025 - Aug 2025
Python, Dash, Plotly, MySQL, MongoDB, Neo4j
- Faculty and publication search, rankings, and side-by-side university comparisons.
- MySQL, MongoDB, and Neo4j integrations with indexing and transactions to support research metrics and visualizations.

Anniversary Report Tool | GeoEngineers, Corporate Alliance Program | Sept 2023 - June 2024
React, Node.js, PostgreSQL, AWS
- Spreadsheet imports, employee search, and filtering backed by PostgreSQL.
- Deployed the full-stack application on AWS and developed Node.js notifications for anniversaries and milestones.
