Education

University of Illinois Urbana-Champaign June 2025 – Present
Master of Computer Science

Western Washington University Sept. 2020 – June 2024
Bachelor of Science in Computer Science GPA: 3.61/4.00

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, C++, HTML/CSS
Frontend: React, Next.js, React Native, Expo, Vite, Dash, Plotly
Backend & Data: Node.js, Express, REST APIs, PostgreSQL, Prisma, ClickHouse, MySQL, MongoDB, Neo4j
Cloud & Testing: AWS (S3, IAM), Firebase, Clerk, Stripe, Docker, Git, Linux, Jest, Playwright, GitHub Actions

Experience

MehtA+ May 2026 – Present
App Development Mentor (Contract)

- Mentor students building VirusWatch in React/Vite for the Congressional App Challenge; break component design, symptom-selection logic, and navigation into student-led development tasks.
- Guide students through React state and import debugging, GitHub setup, Gemini API configuration, and Node.js API testing; use follow-up questions to check understanding and build independent debugging skills.

TradingFlow July 2024 – July 2025
Full-Stack Developer Intern *Redmond, WA*

- Built an options analytics platform with **Next.js, React, and TypeScript**, giving users interactive visualizations and on-demand dataset downloads through **ClickHouse-backed APIs**.
- Optimized frontend rendering and backend queries to improve responsiveness when exploring large financial datasets, contributing to a **30% increase in user engagement**.
- Connected **Clerk authentication** and **Stripe subscriptions** to protect routes and manage subscriber access.

Projects

Career Path May 2026 – Present
React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Clerk, AWS S3

- Built a job-search workspace with application tracking, search/filtering, interview scheduling, follow-up reminders, and dashboard analytics backed by an **Express API and PostgreSQL/Prisma**.
- Enforced per-user access with Clerk and request validation; added **private S3 résumé storage**, PDF checks, and short-lived download links while preserving existing document records.
- Tested application workflows and user isolation with **PostgreSQL integration tests and Playwright**; added responsive layouts, CSV import/export, and automated CI checks.

Weight Tracker – Forma Mar. 2026 – Sept. 2026
React Native, Expo, TypeScript, Firebase Authentication, Firestore, Cloud Functions, OpenRouter

- Expanded a bilingual weight tracker into a five-tab app with **weight trends, food diaries, and goal tracking**; added light/dark themes, cloud sync, and data exports while retaining existing records.
- Integrated **OpenRouter AI** to estimate calories and nutrients from natural-language food descriptions and photos, turning meal input into editable diary entries after user review.
- Moved AI requests into **Firebase Cloud Functions** with server-only secrets, consent checks, validated responses, and usage limits to protect credentials and control API access.
- Added Firestore ownership rules and automated UI, backend, and data-isolation tests; configured CI checks and iOS, Android, and web bundle builds.

Anniversary Report Tool – GeoEngineers Sept. 2023 – June 2024
Corporate Alliance Program project | React, Node.js, PostgreSQL, AWS Bellingham, WA

- Built a **React and PostgreSQL** employee milestone app with spreadsheet imports, search, and filtering, centralizing employee records and simplifying HR anniversary tracking.
- Developed **Node.js notifications** for work anniversaries and milestones, helping HR identify upcoming events and coordinate employee recognition.
- Deployed the React frontend and Node.js backend on **AWS**, giving HR shared access to milestone records and alerts.

Academic World Dashboard June 2025 – Aug. 2025
Python, Dash, Plotly, MySQL, MongoDB, Neo4j

- Built a research analytics dashboard with faculty/publication search, rankings, and side-by-side university comparisons.
- Integrated **SQL, document, and graph databases**; used indexing and transactions to support research metrics and interactive visualizations.
